

A boy out and about: the same goals, in the places they happen.

The Centered Space

Support Coordinators and referrers

Got participants waiting for OT with nowhere to go?

Plan-managed and self-managed plans. Occupational therapy for children, young people and adults, in person on the Gold Coast, in Brisbane and Northern NSW, or online anywhere in Australia. Our OT team has room for new participants now.

Who is this for?

Children, young people and adults
Plan-managed or self-managed. We are not NDIS-registered, so we cannot bill agency-managed plans.

Participants waiting for OT
Sensory and regulation, daily living, school, work, community access, home and living, assistive technology.

FCAs and complex cases
FCAs, home and living assessments and assistive technology are led by our senior occupational therapists. Unsure whether a case is complex? Send it. We say so honestly if we are not the right fit.

Who will the participant meet?

The occupational therapist who is the best fit, chosen with the family
Every clinician here is a trained key worker: we steady the supports around the person first, change the environment before the person, and never write goals that suppress stimming. Whole-team case conferences, an internal NDIS specialist and clinical supervision sit behind every person we support.

Where and how do sessions happen?

Where the barrier happens
Home, school, work and the community, in person on the Gold Coast, in Brisbane and Northern NSW. Online anywhere in Australia.

Online anywhere in Australia
We train the people around the participant, so it keeps working when we are not there.

Is there room now?

Our OT team has room for new participants now, in person on the Gold Coast, in Brisbane and Northern NSW, or online anywhere in Australia. No sign-by date: the participant chooses, in their own time.

The referral path

1. You refer on the page below, or email Liz. Tell us the participant's name, how the plan is managed, what is happening, and who else is involved.
2. Liz, our NDIS specialist, calls or emails you within one business day.
3. Suitability chat with the participant or family. If we are the right fit, together with the family, we choose the clinician who is the best fit. If not, we point you to someone more aligned.
4. Service agreement, then therapy where life happens: home, school, work, the community, or online.
5. You are copied on every communication, with a written update after the first block of sessions and a report at plan review.

What you will find here

Environment first: we change the room before we ask anyone to change. Sensory accommodations from the first appointment, as standard. Regulation before performance. No goals that suppress stimming or make anyone look more normal. Adults as well as children. Co-produced goals: the participant and their family are equal partners.

What does it cost and who pays? NDIS funding may cover OT where it aligns with the participant's goals and approved plan. Not all NDIS plans include OT supports. **Plan-managed and self-managed plans.** We are not NDIS-registered. Check the participant's plan. We confirm rates in writing before any work begins, and NDIS education is always free.

Refer a participant: Liz, our NDIS specialist
